

Logs

$$\log_2 128 = ? \quad \left. \vphantom{\log_2 128} \right\} 2^? = 128$$

$$\log_2 64 = 6$$

$$\underbrace{2^4}_{16} \cdot \underbrace{2^8}_{256} = 2^{12}$$

$$\log(16) + \log(256) = \log(16 \cdot 256)$$
